SHARP CORPORATION, JAPAN

SHARP'S exclusive

Food stays fresher for longer with Plasmacluster Ion Technology

Plasmacluster has an enhanced ion generator that releases + and - ions. Plasmacluster ions released from air vents inside the refrigerator quickly surround and deactivate airborne mold spores. They also reduce odours arising from the propagation of mold. This means the food in your refrigerator stays fresher for longer.

How Plasmacluster Ions Work

Invisible mold inside refrigerator

Positive and negative ions quickly surround and inactivate airborne mold

Food inside the refrigerator after 10 days
